EDUCATION

Dayananda Sagar Institute

CGPA 9.09

Bangalore, India

Dec. 2021 – June 2025

Vidya Mandir Ind. PU College

Percentage 96%

Bangalore, India

June 2019 – July 2021

The New Cambridge English School(ICSE)

Percentage 95%

Bangalore, India

May 2019

SKILLS

Languages: Java, Python, C, C++, MySQL, HTML, CSS, JavaScript

Tools: PowerBi, Figma, Databricks, PhotoShop, Canva, Arduino IDE

EXPERIENCE

JLL Technologies

SDE Intern

Jan.2025-Curr

Bangalore, KA

- Built automated data pipelines using Python, SQL, and APIs to extract, clean, and store large-scale data.
- Automated data loading workflows with Azure Functions, reducing manual effort and improving data freshness.
- Developed insightful Power BI dashboards that enabled IT operations teams to monitor digital workplace performance, detect issues faster, and improve decision-making.
- Leveraged Databricks and SSIS to integrate disparate data sources into SQL Server, enabling anomaly detection and delivering a unified view of large datasets.
- Analyzed data from workplace observability platforms to uncover device usage trends and performance insights, driving IT procurement optimization and improved employee digital experience.

Pragya Health Technologies

SDE Intern

Nov. 2023

Bangalore, KA

- Designed and optimized UI/UX dashboards for project management, enhancing user experience and functionality.
- Developed several applications using OutSystems, leveraging low-code development to expedite project timelines and improve efficiency.
- Acquired proficiency in Robotic Process Automation (RPA) and applied it to successful mini-projects, automating tasks and optimizing workflows.

Information Sharing and Analysis Center

Intern

Nov. 2023

Bangalore, KA

- Analyzed unstructured dark web data to identify trends and anomalies in illicit activities, with a focus on India-specific threat patterns.
- Extracted, cleaned, and interpreted data to support actionable insights for threat intelligence, enhancing monitoring strategies through data-driven analysis.

ACHIEVEMENTS

TechTonic (National Level Hackathon)

First Place

July. 2024

- Designed and Developed a Smart Cane for Visually Impaired Individuals.
- Engineered an IoT prototype with sensors, haptic feedback, object detection via ESP32 camera, and live text-to-speech capabilities for enhanced user support.

Hack-A-League

First Place

Feb. 2024

- Designed intuitive UI/UX enhancements for gamifying a learning application, enhancing user engagement and experience.

Optiv Cybersecurity Hackathon

Oct. 2023

First Place

- Developed and implemented an extension to detect QR code phishing links, leveraging machine learning techniques for model training and optimization.

Cascading Crafts

July. 2023

First Runner up

- Designed and developed a website for local artisans in a web development competition.

Technotackle

July. 2023

First Place

- Designed and developed a website for ASL learning, focusing on user-friendly design and interactive functionality.

EXTRA CURRICULARS

Volunteer: U&I Leader(curr.), PFA (curr.), NSS(curr.)

Others: Robotics & Debate(Winner); Quizzes, Excape Room, CTF & Product Branding(Runner Up); School Captain.
